

## PROFILE

I am a senior at the University of Northwestern St. Paul studying computer science. I have been working with computers, particularly computer programming for close to a decade now. My most proficient skills are web development and python development, but have created traditional desktop and mobile applications as well. Additionally, I have a background in machine learning and database engineering. My passion in life is to make technology that helps people and I am grateful to have been able to work with non-profits, helping them with their IT related problems.

## PROFESSIONAL EXPERIENCE

### Call to Freedom

December 2025 - Present Day

#### Freelance Development

Developed custom analytics software for grant reporting, saving a projected 20 hours of manual pivot table work per quarter

#### Accomplishments:

- Successfully analyzed current business operations and formulated a solution
- Agile development included employee input throughout the design phase

### CircleK

January 2024 - August 2025

#### CSR/Food Service

Handled customers at the register while heading up the food service, stock levels, and store cleanliness.

#### Accomplishments:

- Multiple performance evaluations returned at 95% or higher
- 100% success rate on both internal and external food service inspections

### Culvers

March 2021 - December 2023

#### Crew Trainer

Took a leadership position during day to day operations as well as training new members on basic operations and training co-workers on new roles.

#### Accomplishments:

- Primary leadership position during the morning shift

## EDUCATION
